I strongly urge the FCC to reject NAB Petition 04-160 limiting XM Radio's ability to provide local weather and traffic stations to me. I use their station daily on my commute and find the quality of service far superior to that provided on local AM and FM stations. Since I pay an access fee for XM I see no reason for the NAB to have a right to limit what services I have access to. If the local AM and FM choices were that good, I wouldn't have switched over to a fees based service to begin with.
